

Conxxus TV Self-Install Guide

First, you will need to plug the power cord into the small round port on the back of the Set Top Box labeled DC 12 V, then plug the power adapter into an available outlet.

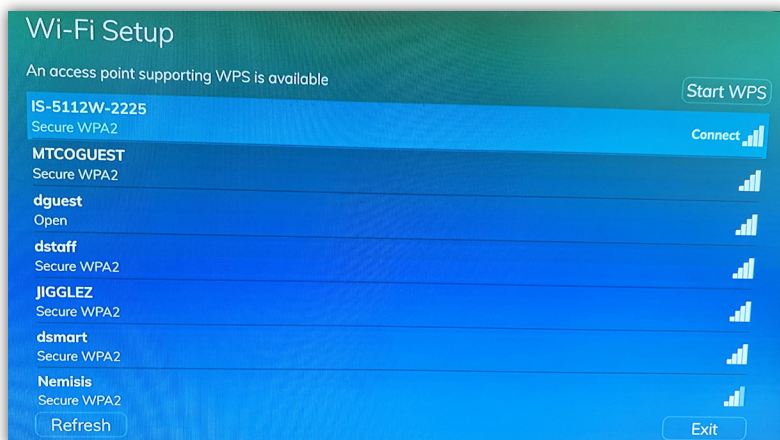

Next, plug the HDMI Cable (Supplied with your Set Top Box) into the back of the Set Top Box labeled HDMI and the other end of the HDMI cable into an available HDMI port on the back or side of your TV.
→ Please remember the HDMI number since you must ensure your TV is on the correct input.

Turn on your TV with your TV manufacturer's remote control to verify you are on the correct HDMI source. You can check this by pressing the Source or Input button on your remote control.

The first screen will ask you to Press OK on your remote to connect your Set Top Box to your wireless network. *(Press STB in the upper right-hand corner of the Conxxus-supplied remote if OK is unresponsive.)*

No network connection.
Make sure the network cable is connected or press OK to setup WiFi.

Select **YOUR** wireless network using the up and down arrows on your Conxxus-supplied remote control. Once you have navigated to your wireless network, press OK. Next, enter your wireless password and select Connect. *(Once connect is selected, it can take 3 to 5 seconds for the next screen to appear.)*

Hello,
We're getting things ready for you.

Almost finished,
We should be done in a moment.

That's it!
You're now connected
to Conxxus TV.
