

Quick Start Guide:

Setting up your MTCO GigaSpire u6 Router on a VDSL Connection

MTCO offers several different devices for the Internet or, in some cases, Internet and TV services. For your convenience, we have marked the device being used on your account to help install your MTCO router.

1

Connect your MTCO GigaSpire u6 Router to a power outlet.
*Estimated Power-up Time.

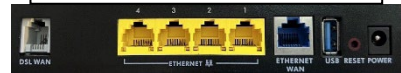

MTCO GigaSpire u6

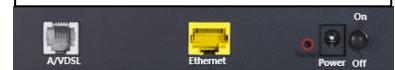

2

Connect one end of the supplied Ethernet cable to the Ethernet/WAN or LAN port of the MTCO-provided Modem (VDSL) and the other end to the WAN port of the MTCO GigaSpire u6 router.

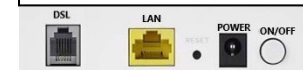

Modem Zyxel 1432 WAN or Port 1

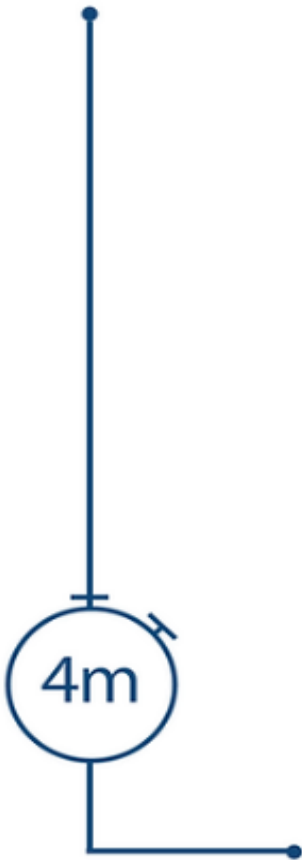

Modem Comtrend VR-3030 Ethernet

Modem Zyxel VMG4005 LAN

Modem Comtrend NL-3122 Ethernet

3

The solid green light indicates that you have successfully connected to the internet.
