

# How do I update my Apple TV– Updated Sept. 2023

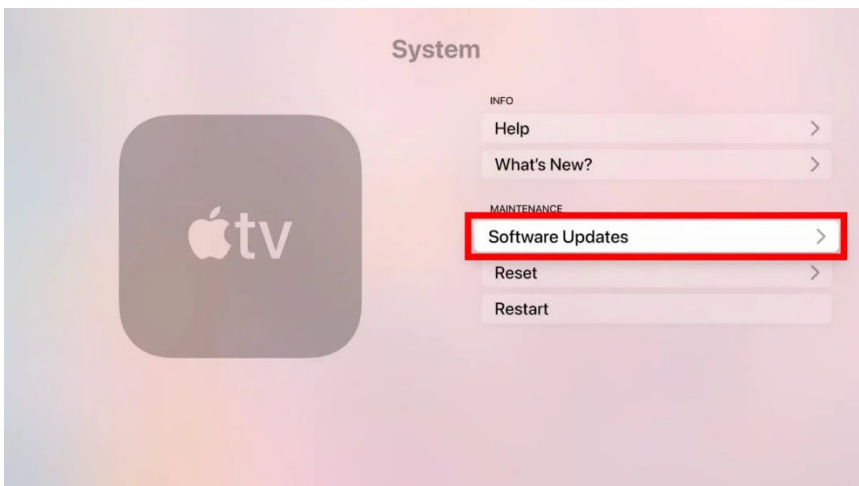

**Step 1:** Open the **Settings** app on your Apple TV. This is the app with the gear-shaped icon on your home screen. You can access it by pressing the Menu button on your remote and then scrolling down.

**Step 2:** Then select **System**.

**Step 3:** Next, go to **Software Updates**.

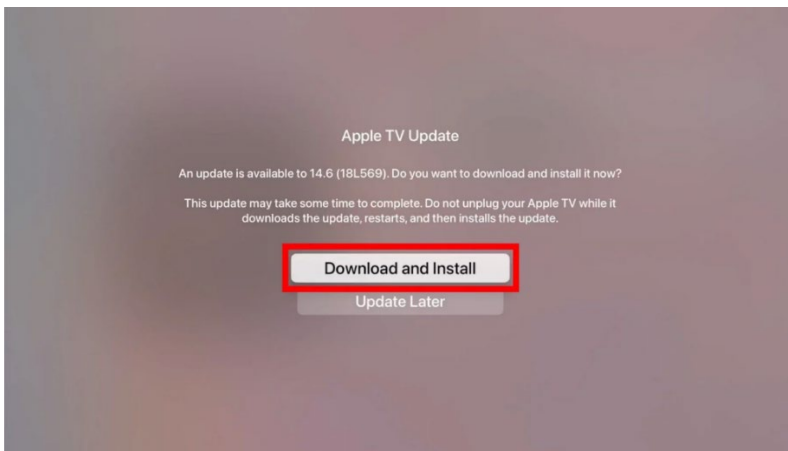

**Step 4:** Then select **Update Software**.

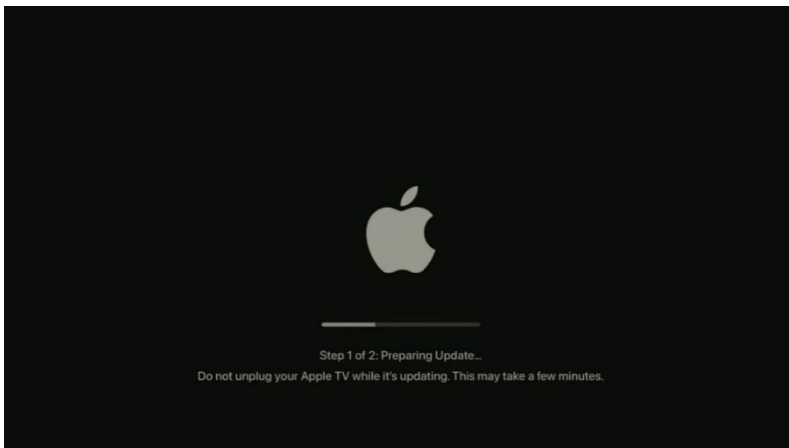

**Note:** Before manually updating your Apple TV, you can turn on automatic updates by selecting *Automatically Update*.

**Step 5:** Next, select **Download and Install** if an update is available. If no updates are available, you will see a message on your screen that says *Your Apple TV is up to date*.

**Step 6:** Finally, wait for your Apple TV to update. Your device will restart during the update process.

## Troubleshooting Updates

If you encounter any problems during the update process, try these troubleshooting tips:

- **Check your Apple TV device's storage space.** Ensure your device has enough free space to accommodate the latest software update. Overcrowding your device's storage can create conflicts and prevent updates from being installed.
- **Unplug your Apple TV device.** If your device seems stuck in the update process, unplug it from the power source and plug it back in after a few minutes.
