

HBO Max Parental Controls

You can create a Kid profile for each of your kids to have their own profile. Each profile can be set up individually on each device with parental controls that limit what content can be watched. You can also use a PIN to prevent your child from switching to another profile.

Create a Kid Profile with Parental Controls

1. Choose the **Profile** icon (Fig. 1) and then on the next screen choose **Switch Profiles** (Fig 2).
2. Choose **+ Add Kid** (Fig 3) on the 'Who is Watching' screen. *If your account doesn't have a PIN, you'll be asked to create one.*
3. Enter your child's name and their birth date (month and year), choose a color, and then choose **Next** (Fig 4 & 5).
4. Choose the content ratings that your child can watch (Fig 6). Movies and shows with content ratings above what you select can't be watched by this profile. (The default selections are recommended and based on the birth date you entered). By default, the **Require PIN to switch profile** is checked so your child can't switch to another profile (without your PIN).
5. Choose **Save**.

IMPORTANT NOTE: So that kids cannot access other profiles and view their content, you will need to log in the first time on your child's device to select their profile. Your child can then only access other profiles if they know the PIN.

For additional details on using the HBO Max you can view the Help Menu when using the app, or visit help.hbomax.com
